

CISM174 : Computer Programming-Visual Basic

This course uses Visual Basic, an object-oriented/event-driven language, to teach fundamental programming concepts. Students with no previous programming experience learn how to plan and create their own interactive Windows applications. Graphic User Interface design skills are emphasized. Students will be able to develop business-related applications.

Credits 4

Lecture Hours 4

Lab/Clinical/Field Study Hours 0

Prerequisites

CISM125 (may be taken concurrently)
