Anthropology

Anthropology Courses

ANTH/BIOL101 : Biological Anthropology—Human Origins and Evolution

Introduction to biological anthropology. Study of human genetics, biochemistry, anatomy, physiology and primatology including the primate fossil record. Demonstrates how biological aspects of humans have evolved and how biological evolution is intertwined with human culture, human behavior, and the environment. Only anthropology course that fulfills laboratory science requirements. Meets General Education requirement for Science.
Credits 4
Lecture Hours 3
Lab/Clinical/Field Study Hours 3
Prerequisites
ENGL080 and MATH073 with grades of C or better, or Placement into ENGL101 and MATH074 or College level Math.

ANTH/PSYC303 : Cross-Cultural Psychology

An examination of the ways in which non-Western people and cultures view psychology. The course will introduce students to the field of cross-cultural psychology, and will examine the impact of culture on human behaviors, thoughts and emotions. Finally, the course will examine cultural views on physical and mental health, psychological disorders and treatments.
Credits 3
Lecture Hours 3
Lab/Clinical/Field Study Hours 0
